## ◆ Packaging Materials

1. Medical Tube Glass Syringe (Sterilized Product): Unit price is high, but it is the most suitable packaging material compared with the tube or general container, and the safety is proved through many test results.
2. Airless PS Syringe : Water leak phenomenon is not occurred due to the increased pressure by the contents after being filled.
3. In case of syringes or tubes of low price plastic material, water leak phenomenon of contents is occurred, and the phenomenon is generated that the contents are oxidized and hardened because of much internal vacant space.
